

BURRO

Carry, Follow, Tow, Scout, Patrol.

Route Burro on the Go. Atlas mission autonomy lets you map routes for Burros from anywhere.

Atlas has revolutionized use of Burro by enabling users to remotely plan routes, from any location with cellular connectivity. Whether you use Atlas to map precision routes for one Burro or for multiple fleets based in separate locations, Atlas makes it easy and convenient.

Create and Manage Routes with Atlas

- Atlas enables users to easily create and manage routes across fleets of Burros remotely.
- This intuitive platform integrates with leading mapping providers (Mapbox, Google Maps, etc.) to provide out-of-the box route planning.
- With the Atlas high-precision option, overlay your GPS-corrected high-resolution aerial imagery for waypoint plotting with sub-centimeter precision.
- Create, name, save and edit routes for fleets. Efficiently manage routes from a single location or for Burros operating in multiple locations.

Included with Burro
Guard Dog™, Towing Packs
and Mowing & Attach Pack
